Nikita Velicko

Web Developer (Laravel / Django)

velicko129@gmail.com | +371 29767397 | Jēkabpils, Latvia | GitHub | LinkeIn

SUMMARY

Junior Web Developer (Laravel / Django) with hands-on experience building web apps: **registration/authentication, CRUD, filtering, data export, and action/audit history**. Worked with **Laravel/PHP** and **Django/Python**; confident with **SQL, REST, HTML/CSS/JavaScript, and Git**. Fast learner, detail-oriented, and focused on delivering clean, maintainable results. Looking for a team where I can grow quickly and contribute from the first weeks.

EXPERIENCE

Web Development Intern / Practice — Feb 2025 – Dec 2025
Scandiweb — Jēkabpils

- Built responsive web pages using semantic HTML5 and well-structured CSS, keeping the layout clean and easy to maintain across devices.
- Added interactivity with JavaScript to improve usability and make UI elements behave consistently.
- Developed an e-commerce template with product cards and a working shopping cart (add/remove items; selected options such as color/size reflected in the cart).
- Worked with Git in a shared codebase, keeping changes organized and collaboration smooth.

EDUCATION

Programming Technician
Jēkabpils Tehnoloģiju Tehnikums

LANGUAGES

Latvian language (B2)

English language (B1)

Russian language (Native)

SKILLS

Backend — PHP, Laravel, REST basics, Python, Django

Frontend — JavaScript, HTML5, CSS3, SASS/SCSS, Tailwind/Bootstrap

Database — MySQL, SQL, PostgreSQL

Tools — Git, Node.js, Webpack/Gulp, Composer, Docker, React.js, Vue.js

PROJECTS

Inventory System (Laravel / PHP / MySQL)

Developed a Laravel inventory management system with **authentication/authorization**, **CRUD**, **category filtering**, **data export**, and **soft-deleted items view**.
Implemented **audit logging / activity history** (who performed which action and when) to improve traceability and support.
Worked with **routing, controllers, validation, database queries, and UI templates**; used **HTML/CSS/JavaScript** for the interface and **Git** for version control.

Spotify Album Rating (Django / Python / Spotify API / OAuth)

Built a Django web app integrating **Spotify Web API** with **OAuth 2.0 authorization** and token handling.
Implemented **album search**, album details pages, and **user ratings/comments** to turn API data into product features.
Used Django's **views, templates, models**, and structured the codebase for maintainability; worked with **REST concepts** and **Git**.

Workout (Vue 3 / JavaScript / Webpack / SCSS)

Created a responsive **Vue 3** application with **component-based UI** and a modern frontend workflow.
Styled the UI with **SCSS** and maintained consistent, reusable styles for easier iteration.
Used **Webpack** build tooling and project structure suitable for real-world development; managed changes with **Git**.
